

SaveThePlanet (STP) — Whitepaper v2 1. Introduction SaveThePlanet (STP) is a global ecological initiative powered by blockchain technology. Our mission is to inspire environmental action, support ecological projects, and build transparent funding mechanisms for global sustainability. 2. Vision & Mission **Vision:** A cleaner, greener planet empowered through decentralized solutions.

Mission: Connect crypto investors with real-world environmental impact. 3. Problem Statement Climate change, pollution, deforestation, and ocean contamination require urgent action. Traditional environmental funding lacks transparency — STP solves this. 4. STP Token Utility - Governance voting for ecological initiatives

- Staking with environmental reward pools
- Funding certified eco-projects
- Community impact ranking system

- Access to partner programs and eco■marketplace 5. Tokenomics **Total Supply:** 1,000,000,000 STP

Distribution:

- 40% Community & Rewards
- 20% Ecosystem Fund
- 15% Development
- 10% Marketing
- 10% Liquidity

- 5% Charity Fund 6. Ecosystem Structure The STP ecosystem includes:

- Decentralized voting hub
- Transparent charity dashboard
- NFT impact certificates

- Crypto payment gateway for eco donations 7. Roadmap **Q1:** Token deployment, logo verification, socials

Q2: Whitepaper v2, GitHub release, website upgrade

Q3: Launch eco■fund, partnerships

Q4: Global marketing campaign + CEX listing preparation 8. Team Structure - Founder: Public profile (LinkedIn recommended)

- CTO: Smart contract and blockchain auditing
- Eco■Advisors: Environmental science partners
- Marketing & Community Leads 9. Risk Factors - Market volatility
- Smart■contract vulnerabilities
- Regulatory restrictions
- Environmental project verification challenges 10. Technical Architecture - ERC■20/BEP■20 compatible contract
- Multi■sig charity wallet
- Automated transparency reporting
- Environmental oracle data integration (planned) 11. Governance Model - Token■based voting
- Proposal system
- Treasury overview panel 12. Transparency Model Every donor receives blockchain■verified impact certificates with timestamps, project status, and CO■ impact reduction. 13. Conclusion SaveThePlanet (STP) aims to become the most transparent, impactful ecological token in the crypto ecosystem.
